SCCC/ATS Trustees Meet

The Seward County Community College/Area Technical School Board of Trustees

held their regular board meeting Monday, Oct. 4, 2010, to discuss the strategic plan and the facilities and land-usage plan.

Dr. Duane Dunn, SCCC/ATS president presented an update of three of the Strategic Plan activities, including facilities and land-usage, Technology and the Career and Technical Education programs and student activities.

Representatives of the firms Bartlett & West and Architect One met with the SCCC/ATS Board of Trustees prior to the board meeting. The group is on campus for three days meeting with students, staff, board members, and community representatives, as they begin developing a long-range facilities and land-use plan for the college. The representatives want to involve everyone in the process as they receive feedback and ideas for the college's facility and land-use planning process.

Cynthia Rapp, dean of instruction, reported on the strategic plan that encompasses Technology and Career and Technical Education Programs. Five programs have completed their curriculum alignment through the Technical Education Authority, including Auto Body Collisions Repair, Automotive Mechanics Technology, Construction Trades Technology, Respiratory Therapy and Surgical Technology. Curriculum alignment is in progress for Computer Information Systems; Criminal Justice: Corrections; Drafting and Design Technology; Heating, Ventilation, Air Conditional & Refrigeration; Machine Tool Technology; Medical Assistant; Criminal Justice: Law Enforcement; and Welding Technology.

The college has been awarded a United States Department of Education Title V grant to begin programs in Process Technology Specialist, Radiologic Technology Specialist and Corrosion Technology Specialist. This is a five-year grant program and the college will receive \$649,991 the first year to begin the program for a total of \$3,249,913 over five years.

All of those programs will be at the Area Technical School.

The college will also be putting together a U.S. Department of Education grant application by November to increase innovative programs in the areas of Science, Technology, Engineering and Math (STEM).

In the area of Student Activities, the college is still considering the addition of soccer, golf and debate. The board reviewed a plan for the addition of soccer, including a timeline, number of athletes, numbers, revenue, expenses, travel and additional personnel.

USD 480 and the city are more than willing to work with the college on the use of their soccer fields, said Galen McSpadden, SCCC/ATS athletic director, ³but if the college is going to be competitive on the same level as our other athletic teams, we need to have our own field. We would need either two fields, including one for practice, or one artificial turf field for both practice and games.²

Presently in the Jayhawk Conference, there are seven women's teams in the west and six in the east and five men's teams in the west and seven in the east.

McSpadden said that it is important to find a coach who would place a high importance on academics as well as create a competitive team. The college would need to hire the coaches at least a year in advance of the program and to get on the schedules of other colleges.

Cynthia Rapp represented the annual update on the Cosmetology program. One goal of the program was to successfully recruit more males to the program, which it has done.

The college had to cancel the nail technology program for the fall 2010 semester until a new part-time instructor is on board. According to new state regulations, the college can have a maximum of 25 students per instructor and if an instructor is gone, not all the students can meet.

Students in the program are using the new Pivot Point teaching material to help build their clientele by learning to pre-book, up-sell, acquire return clients and meet monthly goals for retail.

The board approved the annual update of the Cosmetology program.

Jo Ann Sharp, board member, presented the other board members with the name for the circle drive for the 2010-11 school year. This was an auction item during the 2010 Foundation Party Auction that raised money for scholarships.

The board approved the name of Jo Ann Sharp Drive for one year. At the end of the year, Sharp will receive the sign.

The board adopted a resolution to restructure the revenue bond debt and change to a certificate of participation, which would save the college over 3 percent or over \$340,000. Tommy Williams, dean of administrative services, said the cash savings essentially would eliminate one year of debt service on the current revenue bonds.

The board approved a list of equipment that will be purchased through the Kansas Board of Regents Post Secondary Technical Aid Fund for programs at the Area Technical School. The items include equipment and improvements to the facilities.

Dale Reed, associate dean of educational services, told the board the attendance at the Measurement and Pipeline Institute was up. Prior to this increase, the Petroleum Industry Education Committee was looking at dropping the institute.

Rapp told the board the Susan Copas was named Outstanding Kansas Higher Education Art Educator of the Year Award for 2010-11.

The Professional Employee Association officers for 2010-11 are Cindy Handley, president; George McNitt, vice president; Janice Williams, secretary; and Katy Redd, treasurer.

Each board member was presented with a plaque by the officers of SkillsUSA that was designed by the Drafting Technology students and created with the new water jet machine in Machine Tool Technology.

The SkillsUSA officers for the 2010-11 school year, who were introduced to the board, were Jonathan Yowell, local and district president; David Winkler, local and district vice president; Brandon Bruner, local secretary and district historian; Dustin Rakestraw, local parliamentarian and district

secretary; Caleb Crawford, local and district reporter; and Jeremy Mendenhall, local historian and district treasurer. Not present were Garth Swan, local treasurer, and Dallas Smith, district parliamentarian.

In other action, the board

1. Accepted the resignation of Ray Petty, Safety and Security supervisor;
2. Adopted revisions to Policy on Student Records in Accordance with the Family Educational Rights and Privacy Act (FERPA);
3. Accepted the proposal in the amount of \$94,710 from Southwest Glass and Door of Liberal to replace the Library skylight window re-glazing project.

The next board meeting is at 7:30 p.m., Monday, Nov. 1 in the board room.

Upcoming events include Basketball Preview Night, Tuesday, Oct. 26 in the Greenhouse; a Haunted House, that will be put on by Students in Free Enterprise, from 7-9 p.m., Oct. 28-31 in the Ag Building; and Trick or Treat Street, Oct. 28 in the Student Union and Student Housing.
