Bodies Identified in Texhoma

TEXHOMA, Okla. (AP) - The bodies of two people found in separate places in the Oklahoma Panhandle town of Texhoma have been identified as a woman and her daughter.

The Oklahoma State Bureau of Investigation said Monday the bodies are those of 31-year-old Rose Warner and 5-year-old Alexandria Warner, of Topeka, Kan.

OSBI spokeswoman Jessica Brown says Texhoma authorities found Rose Warner dead near railroad tracks Saturday night after they received a report of a train hitting something.

Brown says the child's body was found in a hotel room off U.S. 54 that the woman had checked into earlier.

Brown says both bodies were sent to the state Medical Examiner's office in Oklahoma City for autopsies.
