Autopsy Results Back on Texhoma Deaths

Autopsy results have been returned on the Topeka woman authorities believe was killed when she walked into the path of an oncoming train October 30 in Texhoma. The reports show 31 year old Rose Warner had prescription drugs to treat anxiety in her system. Her five year old daughter Alexandria was found dead in a Texhoma hotel room. The autopsy report suggests the cause of death is listed as multiple blunt force trauma. Both deaths are still under investigation.
