Greensburg To Get \$4.4 Million For Infrastructure

The town of Greensburg will receive \$4.4 million in federal grants to help repair streets and build a new business park.

The U.S. Department of Agriculture's Rural Development Division says the grants are made through a program designed to make sure rural communities have essential services.

The USDA said Greensburg would receive \$3.2 million to repair and rebuild its streets. A separate grant of \$1.2 million will go toward access roads, water, sewer and other utilities for the new business park.
